CleanTouch™ Ultra Matte Laminates

CleanTouch™ uses the science of Nanotechnology to enhance performance. This revolutionary laminate delivers an ultra matte finish that leaves minimal traces of fingerprints.

Available in a contemporary colour palette of low-light reflecting decors, this laminate's anti-bacterial properties make it the ideal choice for healthcare, retail, education sectors, childcare and community centres.

The hard-wearing attributes of CleanTouch are enhanced by the laminate's thermal recovery properties. Minor surface scratches are repairable, making CleanTouch ideal for high traffic areas.

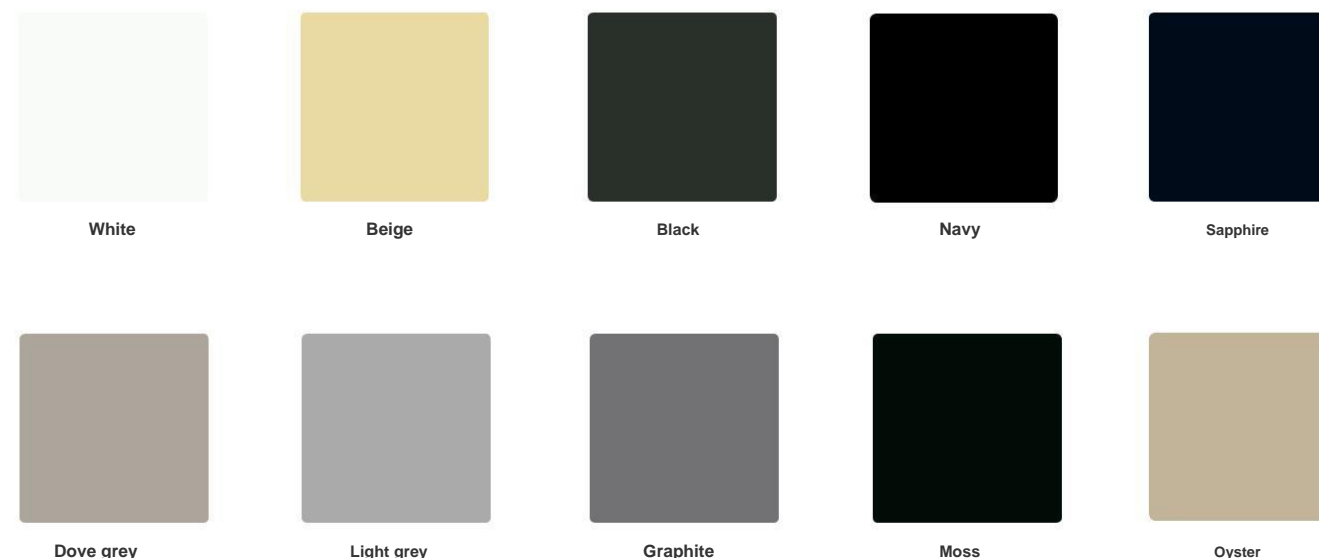

Designed for interior applications, including kitchens, bathroom and laundry cabinetry, doors, wall panelling, furniture, reception desks and commercial joinery.

CleanTouch Panel Products

CleanTouch is available on a range of substrates for horizontal and vertical applications. Choose from MR, FR or standard MDF, HMR and standard particleboard or plywood for doors, interior panelling and wall linings.

Complete the look with a matching 1mm matte finish edging in 23mm & 45mm width options.
